When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in *Nikkei Sangyo Shimbun* (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the *Topeka Capital-Journal* and the September 13, 1983 issue of the *Asian Wall Street Journal*. The *Topeka Capital-Journal* headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

During the decade that preceded Mr Gorbachev's era of glasnost and perestroika, the KGB headquarters in Moscow was putting out a constant stream of instructions to its Residencies abroad. Unknown to the KGB, however, many of these highly classified documents were being secretly copied by Oleg Gordievsky, at that time not only a high-ranking KGB officer based in London but also a long-serving undercover agent for the British. The selected documents in this volume, translated and analysed by the editors with a commentary by Christopher Andrew to set them in context, offer a revealing insight into the attitudes, prejudices and fears of the KGB during what were to prove its declining years.

From the bestselling author of *One Minute to Midnight*, this is the riveting story of the last six months of World War II, when the hopeful Allied situation inspired by the Yalta Conference descended into the open conflict that would lead to the Cold War. When FDR, Winston Churchill and Josef Stalin gathered outside the Crimean city of Yalta in February 1945, they had Hitler's armies on the run, and victory was just a matter of time. Their mission was to forge the decisions that would shape the postwar world, and above all to divide up Europe between Soviet and Western influence. These men had been fighting side by side for nearly four years but the cracks in their alliance were emerging; even before the Second World War ended, another conflict

was beginning. Six Months captures this turning point of the twentieth century, re-creating the steady breakdown in relations between powers. While the Berlin airlift and the Iron Curtain would not arrive for three years, by August 1945 the West and the Soviet Union were firmly on the path to a Cold War. Michael Dobbs brilliantly renders the personalities and geopolitics that drove this descent, illuminating the aims and frustrations of the key leaders. This is a vivid story of power, personalities, and national interests competing at a crucial moment in history. William Parsons, 3rd Earl of Rosse KP PRS HFRSE (17 June 1800 - 31 October 1867), was an Anglo-Irish astronomer who had several telescopes built.[1][2] His 72-inch telescope, built in 1845 and colloquially known as the "Leviathan of Parsonstown", was the world's largest telescope, in terms of aperture size, until the early 20th century.[3] From April 1807 until February 1841, he was styled as Baron Oxmantown.

When Sweetie (Monica Fuller) caught her fiancé in bed with another woman, she swore never to allow any man to get close enough to hurt her again Celibacy and her adult "toy Box" had suited her fine until Gabriel Windahl called her office. Sinfully seductive, his voice aroused needs in her that no toy could fill. Since he was thousands of miles away, she thought it was safe to indulge in late night calls that left her in a state of orgasmic euphoria. Then one morning he showed up in her office, and the real fun began.
