

MILE. Partnerships

1. Fiat regulated half-government exchange with 50B+ USD of daily trading volume in BRICS region:
 - a. Allow international clients to store and transfer value in a stable asset instead of volatile local fiat currency.
 - b. Open global crypto trading.
2. Intergovernmental business/lobbyist organization (28 countries involved):
 - a. Establish an international financial-trading market, where financial, trading and industrial corporations can evaluate, tokenize, trade and collateralize their offline assets.
 - b. Avoid political sanctions and invest in the most profitable countries.
3. Half-government market of government-business partnerships:
 - a. Establish an international market of capitalization of governmental and municipal contracts (factoring).
 - b. 2017 trading volume was about 30B USD.
4. Intergovernmental community with 1B+ people involved:
 - a. Establish an international trading and financing/investments market.
 - b. Establish a non-fiat tool for value storage and transfer.
 - c. Make local branches able to print money via global consensus.
 - d. Cut the cost and time for the cross-border payments/remittance.
5. Government bank in BRICS region:
 - a. Allow foreign investors to invest money in fast developing country and profitable business, avoiding the political sanctions.
6. Big financial-industrial groups in BRICS region:
 - a. Stealth-mode uncensored capital storage and transfer.
7. Crypto-exchanges from China, Korea and Europe with up to 100M USD of daily trading volume:
 - a. List volatile cryptos against XDR. That will make XDR coinmarketcap volume 1B+ USD per day this autumn.
 - b. Buying master-nodes to mint XDRs by themselves via transparent emission algorithm (unlike USDT).
 - c. Buying MILE to issue more XDRs via transparent algorithm (unlike USDT).
 - d. Hedging tool while the market is red.
 - e. Get rid of banks and regulators (e.g. shift from fiat-crypto to crypto-crypto).
 - f. Make global expansion easier. XDR is an international index which is calculated daily to all local currencies (http://www.imf.org/external/np/fin/data/rms_sdrv.aspx).
 - g. Make cross-border arbitrage.
8. Chinese, Korean, European, African and Russian fiat-crypto exchange services:
 - a. Send big cross-border transactions 100 times faster and easier than using BTC or USDT.
 - b. Hedge while crypto market is red.
 - c. One of those Chinese market have 100M USD daily remittance volume.
9. Senegal offline remittance/exchange:
 - a. Send small cross-border remittance transactions from EU labour migrants back home.
 - b. Buy used cars and electronics from EU.
 - c. Trade rice, fish and other resources with neighbour countries.
10. Payment systems:
 - a. Mile Unity Foundation has signed Memorandum of Partnership with GBPpay. GBPpay is a payment system for crypto-fiat transactions operating in all countries in the world. GBPpay allows to its users transfer digital assets to fiat within the platform. GBPpay produce its own banking cards, which could be used everywhere where Visa and MasterCard are accepted.
